

3rd World Congress on
Clinical Lipidology
10 – 12 February, 2017 | Brisbane, Australia

Dr Gilles Lambert

Diabète athérombose Thérapies Réunion Océan Indien (UMR DÉTROU U1188) – Université de La Réunion-CYROI- 2, rue Maxime Rivière 97490 Sainte Clotilde – La Réunion – France

Gilles Lambert is Professor in Cell Biology and Biochemistry at the University of La Réunion Medical School (France) and a principal investigator at Inserm UMR1188 DÉTROU.

Dr Lambert was awarded a PhD in Pathophysiology from the University of Paris in 1998. He specialized in lipidology, first as a post-doctoral fellow at the Molecular Disease Branch of the National Institutes of Health (Bethesda MD, USA) and as a senior research fellow at the Heart Research Institute (Sydney, NSW, Australia).

Since 2003, Dr. Lambert has conducted seminal research projects on PCSK9, a major inhibitor of the LDL receptor. He has received several competitive research grants in Australia (NH&MRC) and in France (ANR) to study the cardiovascular benefits and potential side effects of PCSK9 inhibition.
